No concerns with the design. We're excited for you and would be happy to bring over drinks and food to celebrate once it's done! :)

Yes, that's right. Do you have any concerns with the design?

Hey Jennisey!

Sorry for the delay. I started to look at the drawings right away but had trouble understanding them initially, then the rest of the week got busy. I think I finally understand the design—it'll be mostly enclosed on 3 sides (with slat space in those walls for extra light plus "windows" on the north side) and open with a balcony on the 4th side (your house) and with a trellis roof, correct? Sounds pretty!

Best wishes,
Joanna
